**ROLLER SHUTTERS**

For Protection,  
and comfort.

**LAROS**<sup>®</sup>  
TECHNOLOGIES 

# External roller shutters - the all rounder.

The ROMA roller shutter is capable of far more than just going up and down: ROMA roller shutters are intelligent, and if desired fully automatic systems for:

- Sun protection
- Noise protection
- Privacy protection
- To prevent break-ins
- To prevent loss of heat
- Protection from insects

They are a design element for your façade and an effective protection from the elements. Furthermore, they can positively impact the room atmosphere and comfort levels.

PENTO head box installed flush with the façade  
(requires a certain wall thickness)

Remote control - more comfort and freedom

Privacy with the  
push of a button

# When houses open and close their eyes

It is a natural response to close our eyes from glaring light during the day or at night when we need to rest.

Now your house can do the same with ROMA roller shutters. You can set the roller shutters to open or shut fully automatically when sunlight hits the roller shutters. Or you can control by the push of a button when and how much you want your roller shutters to open or shut.

You regulate the comfort levels inside with the ROMA roller shutters on the outside. In any weather at any time.

# There are lots of alternatives between dark and light.

If you want to combine supreme sun protection with highest light and air supply look no further than the new generation of ROMA roller shutter with motorised tilting mechanism.

We even offer roller shutters for angled windows.

Motorised tilting mechanism

Roller shutter systems TREND0 for angled windows

A close-up, artistic photograph of a person's back and shoulder, lying down. The skin is illuminated by soft, dappled sunlight, creating a pattern of light and shadow. The person's dark hair is visible on the left side of the frame. The overall mood is peaceful and serene.

A safe sleeping aid  
without any side effects

# A body guard in front of every window.

Our standard roller shutters already offer an effective protection from intruders.

ROMA offers an additional security package (optional) with re-enforced bottom plates, guide rails with hidden screw points and a special mechanism that prevents intruders from pushing open the roller shutters.

The security package in combination with a proximity sensor - which causes the roller shutter to jiggle briefly if it detects people outside the roller shutter - makes the roller shutter an important part of the security system of your home.

Security level 1: ROMA security package

Security level 2: ALUMINO protect, extra strong slats for even more safety

Security level 3: No chance for thieves: additional proximity sensor GENIO

# No chance for pesky flies or insects.

## Integrated flyscreens

ROMA roller shutters truly can do everything. The fully integrated insect screen (optional) allows you to protect yourself from pesky insects. It can be fully retracted during winter or other times when you don't need it.

The fly screen uses tear-proof and highly transparent Transpatec mesh. Many of the different ROMA roller shutter types can be combined with the integrated flyscreens.

Integrated flyscreen with head box PENTO.XP

# More protection for your house.

## Sun protection

ROMA roller shutters protect the occupants, furniture and indoor plants from too much sun and UV. The roller shutter prevents the rooms from overheating - that is why a good external sun protection is the most energy efficient air conditioner for your house.

## Noise reduction

Don't underestimate the noise reduction your roller shutter can offer you. The high quality and environmentally friendly foam-filled slats allow peaceful sleep due to their noise reduction qualities.

## Glare protection - combining textile screens & roller shutters

Some of the ROMA roller shutters allow the integration of textile screens. That can be especially attractive in the living areas during the day, when you want the advantage of glare protection and shade but still enjoy a good view to the outside.

## Weather protection

Houses are meant to last for generations. Investing in high quality roller shutters does not just serve the purpose of comfort, but also the protection of your house - especially your windows.

## Automatic fire protection

The fire alarm recognition system SIDEО clears the exit pathways in case of fire: When smoke or fire alarms go off, SIDEО automatically and quickly opens all roller shutters in your home.

Note: battery backup allows SIDEО to work during power outage.

Reliable protection:  
SIDEО - Alarm detection for on-site smoke detectors

# Das moderne Haus denkt mit.

ROMA macht Ihnen die Bedienung Ihrer Rollläden denkbar einfach. Wählen Sie einfach aus, welches Bedienkonzept Ihren Ansprüchen am besten behagt.

Mit den eleganten und intuitiv zu bedienenden Wandtastern bedienen Sie die Rollläden so einfach und komfortabel wie Ihre Beleuchtung. Ein schöner Nebeneffekt: Keine Rollladen-gurte stören das Auge.

Die handliche ROMA Funksteuerung steuert Licht und Schatten bequem von jeder Stelle Ihres Hauses aus. Lassen Sie morgens vom Bett aus die Rollläden hochfahren. Oder fahren Sie abends von der Couch aus alle Rollläden herunter.

Das ROMApad bringt heute schon das Bedienkonzept der Zukunft in Ihr Haus. Steuern Sie Ihre gesamten Sonnenschutzanlagen automatisiert nach vorprogrammierten Szenarien. Oder lassen Sie Ihre Rollläden per Fingerzeig auf den Touchscreen in die gewünschte Position fahren.

Mehr Komfort und Sicherheit: der automatische Lichtsensor von ROMA lässt die Rollläden je nach einprogrammierten Helligkeits- und Temperaturwerten zu definierten Positionen fahren.

Saving energy is the  
best source of  
energy there is.

# Use roller shutters, reduce heating cost.

To build economically, also means to keep the energy consumption of your house as low as possible. Modern roller shutters can help you reach that goal.

Roller shutters - more precisely the air gap between the window and the external roller shutter - serves as an additional insulation layer during the cold parts of the year.

Independent studies have shown, that a closed roller shutter can significantly reduce the lost of heat. The replacement of windows and roller shutters can save up to 40% of energy (from heating).

Air gap between window and roller shutter serves as insulation layer and helps to reduce heating cost.

Green shows the areas with heat loss from the inside to outside.

Red shows the perfect insulation after replacing window and roller shutters with high quality products - the warmth stays inside the house.

Made in Germany -  
with aluminium and  
expertise.

# Our colours, your individuality.

Your house reflects your personal taste - and so does the colour you choose. The ROMA colour collection should offer you all that you need and more: our colour collection offers a large range of colours for high quality and long lasting surfaces.

Our ROMA colour harmony range for example allows you to choose from seven standard colours. These colours allow you to colour-match not just the head box, guide rails and bottom bar but also the colour of your slats.

# ROMA colour harmony range

roma

ROLLADEN  
RAFFSTOREN  
TEXTILSCREENS

If you chose the ROMA Colour Harmony range for your roller shutters, you will find the perfect colour combination. You can coordinate the colour of your head box, guide rails, bottom bar and slats by choosing from the 7 discreet colours.

There are three colour groups to choose from for the exposed aluminium components of your blinds:

- **ROMA Colour Harmony**
- **ROMA Colour Trend**
- **ROMA Colour Variety**

## ROMA colour harmony

The ROMA colour Harmony aesthetically matches all exposed aluminium components of your textile screens. The seven harmonious colours are available as standard in the three surface finishes Smooth matte, Fine structure matte and Highly weatherproof fine structure matte 1 for boxes, guide rails and bottom bars.

ROMA 9016  
(similar to RAL 9016)

ROMA Grau

ROMA Weißaluminium  
(similar to RAL 9006)

ROMA Graualuminium  
(similar to RAL 9007)

ROMA Sarotti

ROMA DB 703

ROMA Anthrazitgrau  
(similar to RAL 7016)

Highly weather-proof is subject to extra cost.

Colour variations are possible due to printing technology. Please always use original colour samples when deciding.

# ROMA colour trend - 42 colours for every taste.

Are you a trendsetter? Then go for the ROMA Colour Trend. You will find the colour you desire in 42 shades and three surface finishes smooth matte, fine structure matte and highly weather-proof fine structure matte. Moreover, the surface finishes smooth matte and fine structure matte are available as standard powders from the two leading colour powder manufacturers IGP and Tiger.

RAL 1013 Oyster white

RAL 1015 Light ivory

RAL 2000 Yellow orange

RAL 3003 Ruby red

RAL 3004 Purple red

## ROMA colour variety - unlimited possibilities

(only for Head box, guide rails & bottom bar – for  
slat colours see below)

The ROMA Colour Variety makes everything even more colourful. With an additional 150 RAL colour hues suitable for facades and 150 additional possibilities for boxes, guide rails and bottom rails, all desired colours are covered. The two surface finishes smooth matte and fine structure matte (IGP available with the 150 RAL colours provide the finishing touch.

RAL 8001 Ochre brown

RAL 8003 Clay brown

RAL 8007 Fawn brown

RAL 8011 Nut brown

RAL 8014 Sepia brown

RAL 8016 Mahogany brown

RAL 8017 Chocolate brown

RAL 8019 Grey brown

RAL 8022 Black brown

RAL 8028 Terra brown

RAL 9001 Cream

RAL 9003 Signal white

RAL 9005 Jet black

RAL 9010 Pure white

All colours in the ROMA Colour Variety are subject to additional costs.  
Colour variations are possible due to printing technology. Please always use original colour samples when deciding.

# On the outside, a roller shutter - in the inside, high-tech

Roller shutters are exposed to extreme weather: summer heat and frost – so the material and the way a roller shutter is built are crucial.

The ROMA ALUMINO slats were specifically designed for high quality & longevity. Aluminium is corrosion-resistant and 100% recyclable. The foam core further adds to the strength of the slats.

All our Aluminium slats are double-walled and designed for longevity. Regardless of the type of slat: ALUMINO, ALUMINO protect or plastic, quality is of utmost importance for us at ROMA. Depending on the roller shutter type and slat type, you can choose from over 20 colours.

ALUMINO protect: ROMA's top-product with foamed (expanded?) core for added protection against intruders.

ALUMINO: ROMA's most popular design with strong Polyurethane insulating foam and high longevity.

Plastic: ROMA's cost effective solution

# ROMA slat colours - many choices

You can choose from a large range of colours for your roller shutter slats. Depending on your slat type, you can choose from up to 22 standard colours.

All surfaces of the ROMA roller shutter are weather-proof and non-fading. Standard care and simple cleaning is sufficient.

## Standard colours for roller shutter slats

			
Lichtgrau	Grau	Anthrazitgrau	Creme-Weiß
			
Silber	Beige	ROMA 9016	Elfenbein
			
Sarotti	Purpurrot	Blassgrün	Tannengrün
			
Moosgrün	Pastellblau	Stahlblau	Graualuminium
			
DB703	Holz hell	Holz dunkel	Golden Oak
		 Harmonisch zu den Elementfarben der ROMA Farb-Harmonie	
Braun meliert	Dunkelbraun meliert

# Quality and ideas produced in Germany

It only took three decades for ROMA to become the German market leader for roller shutters. Furthermore, ROMA continuously drives innovative solutions for Venetian and zip.SCREEN blinds.

All ROMA roller shutters, Venetian and zip.Screen blinds are manufactured in four factories in Germany. We pride ourselves in the cooperation between architects and builders.

ROMA main office and factory Bargau

ROMA factory Rostock

We have initiated the so called ROMA FORUM, a place where architects & builders meet to discuss the future of our living spaces, where lectures are being held and where we train our partners for excellence in consulting and installation.
